Christopher Sullivan, PhD is a graduate of the University of Washington in Seattle, WA, where he wrote his dissertation on the development of telephone systems in newly industrializing countries. He came to Florida State University to teach courses in telecommunications and new communication technologies and initiated a research program in computer-mediated communications. He has published articles and made numerous professional presentations on the use of information technology for communications. While working for a private software company, Dr. Sullivan took the lead in marketing and training over a thousand teachers on a web-based educational software application.

Dr. Sullivan has worked as a health care analyst in several state agencies before coming to the Agency for Health Care Administration. He is currently the administrator of the Office of Health Information Technology in the Florida Center for Health Information and Policy Analysis in AHCA. Dr. Sullivan is coordinating the Florida Health Information Network (FHIN) initiative, and acts as a liaison for the emerging regional health information organizations (RHIOs) statewide. He is a contributing author and editor of the Draft White Paper, "Florida Health Information Network Architectural Considerations for State Infrastructure." This document is a road map of technical standards that can be used to build a statewide network, laying out guidelines for interoperability for emerging RHIOs around the state.
